

Lash Lift Instructions

1. Ensure lashes are thoroughly cleansed using the cleansing solution (code: SPK6). Choose the correct size curling rod or silicone curler depending on client's eyelash length or desired curl.
2. Place an under eye gel patch over the bottom lashes to avoid solution affecting these lashes.
3. At the base of the eyelashes, apply enough glue on the eyelid to cover an area equal to the width of the roller or curler. Bend the roller or curler a little to fit the curve of the eyelid and place it on the lid as close as you can to the base of the eyelashes.
4. Using a y-brush (code: SPK13) or lash lifting tool (code: LT1), fix the eyelashes one by one onto the roller or curler. Make sure the eyelashes are straight and do not overlap or kink at the ends.
5. Apply the lifting lotion (code: SPK3) to the lashes with a cotton bud. Make sure the lotion is thin but covering all the lashes. Leave on for 10-15 minutes, then wipe away the solution using a cotton bud.
6. Next, apply the setting lotion (code: SPK4). Leave on the lashes for 10-15 minutes, then wipe away the solution using a cotton bud.
7. Using a cotton bud, gently wipe the lashes using the cleanser (code: SPK6) to remove any solution residue. Once clean, you may tint the lashes at this point.
8. Finally, remove the rods or curler and apply the nourishing lotion (code: SPK5) using a cotton bud or mascara wand to keep lashes healthy and hydrated!

Results last for up to 8 weeks!

Brow Lamination Instructions

1. Ensure eyebrows are thoroughly cleansed using the cleansing solution (code: SPK6)
2. Brush the brows upwards using a Y-brush (code: SPK13) or mascara wand and apply the glue (code: SPK14). Once the brows are coated, brush again to ensure all hairs are brushed upwards and straight.
3. Apply the lifting lotion (code: SPK3) in an upwards direction using a cotton bud. Take a large piece of cling film and place on top of the brows. Leave on for 8-10 minutes, then wipe away the solution using a cotton pad.
4. Apply the setting lotion (code: SPK4) using a cotton bud and place a clean piece of cling film over the brows. Leave for 10 minutes, then wipe away the solution using a cotton pad.
5. Gently wipe the brows using the cleanser (code: SPK6). Once clean, you may tint the brows and trim or pluck any stray hairs to create a neater finish!
6. Finally apply the nourishing lotion (code: SPK5) using a cotton bud or mascara wand to keep brows healthy and hydrated!

Results last for 3-4 weeks!
