

Replacing the UV bulb

- Please use a T5/6W UV bulb with wave length of 220-275nm. Quartz UV bulb is recommended for best performance. If quartz UV bulb is not available, please use a T5 6W High Boron UV bulb.
- Turn off the unit and unplug the cord from power outlet.
- Unscrew the faulty UV bulb as indicated on the diagram (1).
- Screw in the new UV bulb as indicated on the diagram (2).

UV Bulb Type	T5 6w Quartz bulb 220~275nm	
Suggested time of Disinfection	10 minutes	
Servicing life of UV Lamps	5000 hours	

Operating Instructions

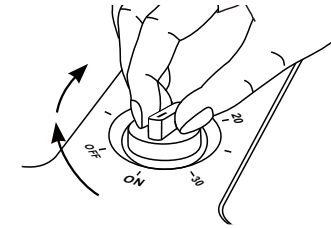

1. For first time usage, please clean the cabinet and the shelves thoroughly. Make sure the cabinet and shelves are completely dry before operation.
2. Put the tools and accessories that need disinfection on the shelves in the cabinet. Close the door and connect the power supply.

3. Turn the timer knob anti-clockwise to ON position, the unit will switch on and stay on until turned off manually.

4. Turn the timer knob clockwise to set up desired disinfection time. Recommended disinfection time is 10 minutes for regular operations. The unit will automatically switch off when it reaches the set time.

5. To protect users from hazards of UV lights, if the door is opened during sterilizing process, the microswitch will be activated and automatically switch off the unit. Once the door is closed, the unit will resume working.
